

Software-Only WAN Optimization

Works on the Existing Network Infrastructure

- ⇒ Interoperates over any routed IP networks and WAN infrastructures
- ⇒ Software that resides on VMware ESX, ESXi and vSphere platforms
- ⇒ Installed as a virtual appliance on VMware
- ⇒ Does not compromise the Cisco network purity like the hardware WAN optimizers
- ⇒ Rate controls features improves bandwidth availability for Cisco WAAS
- ⇒ Enhances disaster recovery application productivity over wide area networks
- ⇒ HyperIP software scales from 1.5 Mb/s to 800 Mb/s in performance
- ⇒ Simple to deploy for trials and field tests
- ⇒ Managed and installed from a central location using VMware VMotion
