

Product Announcement

Date: January 9th, 2009

NetEx is pleased to announce HyperIP Software release 5.5.1 which is available, effective immediately.

This new release provides support for HyperIP Data Transport Optimizer to operate with a VMware ESX platform. This provides the following benefits:

- **Eliminates the need for NetEx supplied hardware.**
- **Allows customers added flexibility for the deployment of HyperIP into a VMware infrastructure environment.**
- **For VMware, HyperIP is distributed via a CD/DVD.**

For customers of record, this is a critical maintenance release and is available as a no-charge upgrade. Consistent with our support policy:

Support for HyperIP Release 5.5 ends on August 1, 2009.

Support for HyperIP Release 5.4.6 ended on February 1, 2009.

Earlier releases are unsupported.
