

## Product Announcement

Date: November 13, 2009

NetEx is pleased to announce a new version of eFT213 for IBM z/OS systems.

This new software is available, effective immediately. This release is available as a no-charge upgrade to eFT213 customers of record.

### **eFT213 R 5.4 eFT for IBM z/OS Systems**

New enhancements/features:

- **ISPF Panel support**
- **New scripts for easing the migration from prior releases of USER-Access and/or eFT transfer applications**
- **Support for RESOLVER Address Space**
- **New configuration options to specify ephemeral ports**
