Product Announcement

Date: October 1, 2008

NetEx is pleased to announce new versions of eFT for HP9000 & Integrity HP-UX Systems. The new software products are available, effective immediately.

These eFT software products are interoperable with other supported versions of eFT and USER-Access file transfer products. A new license is required to operate the eFT323I which supports the HP Integrity systems. Customers currently licensed for eFT323 are eligible for a no cost upgrade for this latest version of eFT323 software.

These new releases allow for the following:

eFT323   Release 5.2.0 N4   Supports HP9000/HP-UX PA-RISC platforms
eFT323I   Release 5.2.0 N4   Supports HP-UX Integrity (64-bit) platforms
