# Product Announcement

Date: June 17, 2011

NetEx is pleased to announce a new version of NetEx/IP software for Unisys OS22000 Systems (H300IPC Release 7).

This release provides Ethernet connectivity to a NetEx/IP network from a Unisys platform as an alternative to using NESiGate channel connected ESCON appliances. This new software product is available, effective immediately.

This new software release provides the following:

**H300IPC    Release 7        Unisys OS22000  Operating Systems**

**Supports Unisys ClearPath & Dorado 3xx, 7xx and 41xx platforms with CPCOMM (w/ Ethernet connectivity)**

H300IPC will eventually be the replacement product for all prior H300IP and H310IP channel-based Unisys NetEx/IP products.

H300IPC is a new product and requires a new software license and key.

For more information visit the NetEx/IP Software Support Page for Unisys.
