

Product Announcement

Date: May 3, 2010

NetEx is pleased to announce HyperIP Software release 5.5.3 which is available, effective immediately.

This new release provides the following benefits:

- **VMware Ready Status from VMware**
- **VMware Tool Support – Integration with ESX and Virtual Center**
- **Open Virtualization Format (OVF) Installation Support**
- **New Tuning Parameters for HyperIP Transmission Rates**
- **New CLI Commands for Initial Configuration and Setup**
- **New Graphing Techniques & Persistent File Support**
- **HTTP(S) Support for Software Upgrades**

For customers of record, this is not a mandatory maintenance release and is available as a no-charge upgrade. Consistent with our support policy:

HyperIP Releases, 5.5.1 and 5.5.2 are still available with no announced end of support dates at this time.

Earlier releases are unsupported.
