Product Announcement

Date: Sept 23, 2011

NetEx is pleased to announce HyperIP release 6.0 which is available, effective immediately.

HyperIP Release 6.0 is a feature release that provides support for a Microsoft's Hyper-V hypervisor installations. HyperIP Release 6.0 is a not a mandatory upgrade for HyperIP Releases 5.5.1/2/3.

This new release provides the following benefits:

- **Support for Microsoft's Hyper-V virtualization**
- **Integrated Components for Windows Server 2008 Hyper-V**
- **HyperIP for VMware installation via OVA (support for vSphere 4.0/5.0)**
- **Reduces CPU utilization for bandwidths less than 100Mb/s – additional tuning parameter for higher bandwidth requirements**
- **New CLI commands to perform initial configuration**
- **Raw TCPdump exports available**

This release is available from Network Executive Software by download, and is available as a no-charge upgrade to HyperIP customers of record.

Consistent with our support policy:

> HyperIP Releases 5.5.1, 5.5.2 and 5.5.3 are still available with no announced end of support dates at this time. Earlier releases are unsupported.
